

Bring out your original beauty  
from inside  
~ sleeping beauty power shines ~

## GLY Inner mois granule 『Beauty Balance』

Strictly selected rich materials are used to  
“revitalized” and “activate” a brilliant beauty

- Collagen GLY tripeptide
- Red clover
- Crystal lactic acid bacilli TM  
(patented ingredient)
- Brightening pineapple®
- Vitamin C

Red clover containing more isoflavone than soybeans and body beautifying lactic acid are combined with “ultra absorptive collagen”, which has approx. 18 times more absorptive power! Restores inner balance of a body with accumulated years

[Yogurt flavor] Granule type  
2.5g × 30 packets / 8,500 yen (tax included)

# The smallest collagen that defies current conventional knowledge on collagen! Especially for collagen, the type is important.

## Super absorptive type “Collagen GLY tripeptide” composition

Collagen from food is comprised of approx. 3,000 amino acids, and has a very large molecular weight. It cannot be absorbed as is. Therefore, general supplement uses low molecular collagen which corresponds to about 100 amino acids, however, ultra absorption collagen which was cut collagen to the tripeptide (3 amino acids), to the minimum unit, the absorption speed is fast, and you can realize the effect right away.

Super absorptive type  
**Absorption amount 18 times**

Collagen GLY tripeptide

This is the smallest collagen unit, comprised of three amino acids with glycine in front.

This is different from conventional collagen supplement + synthesized collagen

	Gelatin Collagen	Collagen peptide (low molecular collagen)	Collagen GLY tripeptide
Molecular size	large		small
Absorption	small	only a fraction that happens to breakdown is absorbed	absorbed as is large
Activity in the body	small	Dissolved in the body and only becomes nutrition. Collagen synthesis is not promoted	Collagen synthesis in the body is promoted large

Don't give in to age!

Restore beautiful skin to look 10 years younger

Regulates inner body balance, strictly selected rich materials to “revitalize” and “activate” your skin's beauty

Four absorption types \*  
Includes isoflavones

Since red clover isoflavone is an aglycon-type isoflavone without sugar, so sugar does not need to be removed by a glycosidizing process by intestinal bacteria. It can be rapidly absorbed regardless of the condition of intestinal bacteria, and can efficiently exercise effect.

\*Aglycon-type

Rejuvenescence

Red clover

Activation

Crystal lactic acid bacilli™ (patented ingredient)

Certification included!  
R&D at national agencies. Crystal lactic acid bacilli which brings beauty skin

The lactic acid bacilli for women, which has confirmed anti-aging action such as anti-oxidant activity and immune system activation.

Skin whitening

Brightening pineapple® (ceramide)

Improve your skin tone, create bright skin

Contains an inhibitor effect for the production of melanin, which causes stains and dullness in the skin, leading to clear and brilliant skin.
