

Super Detox Diet

SUPER DETOX DIET SUPPLEMENT

<INGREDIENTS>

- Bio Carbon
- Super Enzyme
- Bifidobacteria (1billion per pack)
- Indigestible dextrin

<CONTENT QUANTITY>

1.5g per pack

<HOW TO TAKE>

Please take one pack at a time as it is.

<SUGGESTED RETAIL PRICE>

3,980 JPY tax separated

Bio Carbon

Compared to activated carbon, Bio Carbon has a variety sizes of holes and can absorb **quickly, and highly concentratedly.**

- Japanese redpine (Activated carbon)
- Bamboo charcoal (Charcoal)
- Coconut shell (Activated carbon)
- Bio Carbon (Porous activated carbon)

Experiment ①

<Method>

Dropped a teaspoonful of chilli oil into each cup of water, then put 500g of charcoal to check how much they absorb the chilli oil.

<Result>

All of them absorbed the oil, but especially the Bio Carbon absorbs and puts the oil together completely.

Experiment ②

<Method> Put gardenia pigment (food additive) into each cup of water, add 500g of charcoal and stirred, and filtered.

<Result> Immediately after the charcoal was added, it absorbed the pigment and the filtered water turned to clear water.

- ① Nothing added
- ② Japanese redpine (Activated carbon)
- ③ Bamboo charcoal (Charcoal)
- ④ Coconut shell (Activated carbon)
- ⑤ Bio Carbon

Enzyme dissolves to help absorbing and removing fat!

Activated carbon was used as antidote in ancient times. Presently it is used to take in the body, to help absorbing impurities which also causes bad smells.

Conventional chaff →

Super Enzyme dissolves fat! Bio Carbon wraps and removes fat!
