GLY INNER MOIS Granule Beauty White

Beauty White

Make a beautiful difference

Contains GLY tripeptide collagen with 18 times^{*} more absorption

Collagen, which is found in foods, has a large molecular weight and consists of about 3,000 amino acids linked together, so it cannot be absorbed by the body as it is.

Low-molecular collagen also consists of about 100 amino acids linked together.

GLY tripeptide collagen is the smallest size consisting of 3 amino acids. With 18 times^{*} more absorption, it makes a beautiful difference.

^{*} Manufacturer research

What is GLY tripeptide collagen?

It is the smallest unit of collagen, consisting of three amino acids, starting with glycine.

	Gelatin collagen	Low-molecular collagen	GLY Tripeptide Collagen
Molecule size	Big	Medium	Small
Absorption	Not absorbed as is	Easier to absorb than collagen	Absorbed as is

Three key ingredients for dazzling clarity

Ginseng berry extract

Ginsenoside Re is a useful ingredient contained in ginseng fruit and ginseng berry extract. Supports youthful beauty.

Rose petal extract

A rare rose petal extract that only 1g can be extracted from approximately 200 petals. It is rich in polyphenols.

Lychee seed extract

Supports your beauty with extract from the seeds of lychee, a fruit favored by Yang Guifei, one of the world's three most beautiful women.
