Triple VC Neo 2000

3 types of vitamin C continue to reach the body through 'time lag absorption'

Vitamin C is an excellent nutrient.

However, even if you take a large amount at once, it will be excreted from your body.

TRIPLE VITAMIN C Neo2000 is a uniquely developed supplement that can efficiently absorb three types of vitamin C.

We have achieved staggered absorption with vitamin C that is quickly absorbed, liposomal vitamin C that reaches all parts of the body, and vitamin C derivatives that reach slowly.

Shining yourself,
Be healthy and beautiful
by Time difference absorption
Vitamin C

Vitamin C

Classic vitamin C that is quickly absorbed

Vitamin C is a classic beauty and health ingredient. It is characterized by the fact that it reaches the body quickly and you can expect its power immediately.

Liposomal vitamin C

Vitamin C with advanced technology that reaches every corner

Vitamin C, which is wrapped in extremely small lipid capsules called "liposomes," is currently attracting a lot of attention. It reaches every corner of your body.

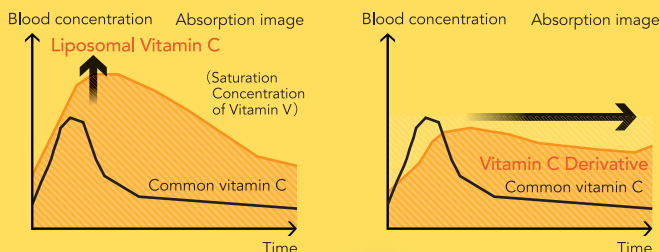

Vitamin C derivatives

Vitamin C that is delivered slowly and with increased stability

Vitamin C, which is sensitive to heat and acid, has been made into a derivative to increase stability. It takes time to reach your body.
