

Nature, technology, quality.
Skin beauty created by Japan,
for you

At Bio, we develop and design unique and value-added health foods, supplements, and cosmetics.

We have an integrated production system that includes our parent company FI Corporation, which has a 30-year history, and partner manufacturers for various processes, from raw material blending to molding and processing, bottling, and packaging.

With our efficiency and flexibility, we can provide precision responses to suit market size and customer needs and characteristics, from small-lot production to mass production.

We make use of natural materials to create hit products with value-added featuring high-level Japanese quality.

Contents: 60 tablets

Manufacturer's suggested price ¥29,500 (JPY)

ALL PLANT BASED

Plant-based ingredients used for both raw materials and capsules

Main ingredients

Bulgarian rose oil

Pomegranate seed oil

Astaxanthin

BULGARIAN ROSE

A refreshing scent from the valley of roses

A treasure trove of roses: The valley with two rivers flowing between the Sredna Gora Mountains, a Balkan mountain range that runs from east to west in the center of Bulgaria, is dotted with fields of roses that stretch for 150 km.

Condensed natural scent from damask roses picked as they bloom under the morning sun.

Roses are fragrant in the morning as the sun rises on the misty valley. By hand-picking the flowers in the early morning when they bloom, we preserve the fragrance before it can be released.

The small amounts of rose oil that accumulate in the supernatant of rose water is steamed at 200 degrees and condensed into the elegant scent of the queen of roses.

The rose oil that collects slightly in the supernatant is packed with the elegant fragrance of the queen of roses.

The Bio brand creates health from the blessings of nature and visits production areas around the world to carefully select quality ingredients.

BEAUTY INGREDIENTS

Beauty ingredients + an exquisite fragrance

A scented supplement that packs beauty and scent into a single drop

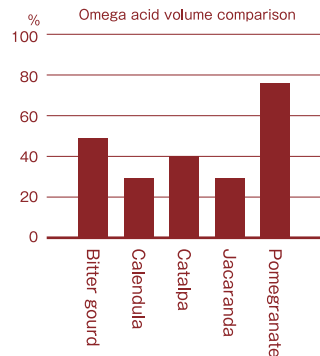

Pomegranate seed oil

Antioxidant effect

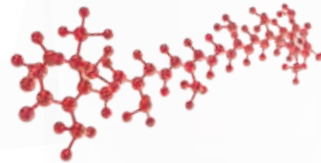

Punicic acid, the main ingredient in pomegranate seed oil, supports skin activation and collagen production. This not only slows down the aging process, but also improves skin firmness and elasticity.

Omega-5 punicic acid, a rare fatty acid
Pomegranate seed oil contains over 75%

Each droplet contains 136.5 mg of pomegranate seed extract, which is extracted from a breed that is said to contain many unique ingredients among pomegranates.

Astaxanthin

Active oxygen elimination effect

A type of red natural pigment (carotenoid). Astaxanthin has a strong antioxidant effects, Highly toxic among active oxygen species
*The power to remove singlet oxygen, Also excellent at suppressing lipid peroxide.

*Singlet oxygen is generated from oxygen by ultraviolet rays, similar to hydroxyl radicals, which are a type of active oxygen.

Singlet oxygen scavenging power

6,000 x  more than vitamin C

Lipid peroxidation inhibitory power

1,000 x  more than vitamin E

Modified from Nishida Y, et al., (2007). Carot. Sci.11:16-20.

Astaxanthin is known to be found in shrimp, crab, etc. FLOWERYOU is extracted from Haematococcus algae We use plant-based raw materials.

Bulgarian rose oil

Relaxation effect

Said to have the effect of stimulating the secretion of hormones in the brain such as dopamine, which increases mood, and serotonin, which stabilizes the mind, and has a relaxing effect by relieving stress and tension.

Only 1g can be harvested from 3,000 roses.
Uses rare damask rose oil

ALL PLANT BASED

Add appeal with plant-based ingredients

Because we are highly concerned about the environment and raw materials, we provide added value by using plant-based raw materials.

Uses plant-derived capsules and no animal ingredients
